

2 Gallon KITCHEN CADDY

PRODUCT SPECIFICATION

The 2 gallon Kitchen Caddy is the perfect solution for collecting food waste in the kitchen whether for collection or home composting. The wide landscape aperture allows food to be easily scraped into the caddy and the single-piece carry handle is comfortable for lifting and tipping. The locking lid is determined by the position of the carry handle and the liner trap secures compostable liners.

Standard Colour Range

Brown or Green made with a minimum of 50% recycled content. Black is also available with 100% recycled content.

Other colors are available on request, minimum orders are required.

Specification and Packing

Capacity 2 gallons

Approx weight (empty) Body 280g / Lid 82g / Handle 36g

Total weight 398g

552 units per standard pallet /30 pallets per load / 16,560 units per load. Fully assembled in the manufacturing facility.

Offloading

Offloading requires Fork Lift Truck. Alternative arrangements (tail-lift, pallet truck, mofett) available as optional extras to be covered at quotation stage.

Products are supplied on pallets for the purposes of freight efficiency.

In order to ensure the stability of the stock in transit, we utilize a cardboard pallet sleeve and ensure stretch wrap is secured to the base pallet and encases the sides of the second pallet. However, this packaging cannot be water tight, therefore, the cardboard material may deteriorate rapidly if the stock is not housed internally. Further, if the storage area is not level, stability may be a problem. As a result, we must strongly recommend that goods are offloaded with a fork lift truck and either stored undercover.

End of Life Recycling

Upon end of life all of the Kitchen Caddy components are fully recyclable.

Tests - At 8 hour intervals a random production sample is tested:

- 1) Strength of handles - Suspension test – set first complete unit aside to cool for two hours. Suspend loaded with 7kg for 1 hour, ensuring handle centrally placed on the rig.
- 2) Impact strength of base - 1 m drop test with flat base impact on concrete loaded with 7kg.
- 3) Handle lock test - Check full handle motion, therefore the locking mechanism and lid fit.

Warranty

We are happy to offer a 5 year warranty on our Kitchen Caddy. The warranty is made on the basis that this product is utilized for the intended purpose only; collection of domestic food waste while stored internally within a property. Any perceived failure of product in circumstances where the caddy has been used for any other purpose or has been subject to anything other than normal operating conditions will not be covered by the terms of this warranty .
